The Problem

Many organizations helping the homeless lack technological and monetary backing make it difficult to solicit themselves.

Information sources are not always available, hard to use, and prone to error.

It is difficult for the homeless to find the proper resources that are available to them.

Web App Highlights

Capacity Tracker

- Know how many beds are available at a shelter
- Updated in real-time

Easily Accessible

- Easy to navigate and use site
- Mobile friendly

Information Access

- Receive organization updates through email or text
- Send information to yourself through email or text

The Population

Homeless Individual

Homeless Organization

Varying levels of literacy

Limited experience with technology

Many have cellphones, some have smartphones

Provide info ad hoc
